

LAURENT MEYER

SENIOR
FULLSTACK
ENGINEER

Computer fanatic since my childhood, I began to work for various companies since I was 18. At 20, I cofounded my first company that we scaled to 7 digits revenue. I am looking for a new challenge in demanding environments to use my technical and management skills in order to make an impact.

TECH SKILLS

- **Python** (6 years): Created the whole Software for JobNinja GmbH. The software is based on a Flask – SQLAlchemy – Postgres Stack. I have a deep understanding of web development in Python.
- **ReactJS + React Native** (3 years): Used to create apps for JobNinja GmbH and HR4YOU AG. I'm familiar with Redux as well. I feel confident in building any app in a reasonable timeframe.
- **Android** (4 years): Used it for JobNinja GmbH, Shore GmbH, MoiD GmbH, HR4YOU AG, SWOP Team and some hobby projects.

SOFT SKILLS

- **Get it done:** At JobNinja, we created a faster, cheaper and better service than our competitors – partially because I always preferred to have something done over something perfect.
- **Manage stakeholders:** Managed the external projects (mostly for HR4YOU AG) and lots of internal projects with remote freelancers. I've also been involved in lots of customer meetings supporting the sales team with my technical expertise.
- **Scale:** My focus is always to build something bigger and better. At JobNinja, we started from scratch and scaled it to half a million monthly users! At Quatico, the project I am working on will get millions of visitors per day.

EXPERIENCES

SENIOR FULLSTACK ENGINEER

QUATICO AG | JULY 2021 - TODAY | ZURICH

- Building the new version of the website of our biggest customer.
- Bringing expertise mostly in frontend (React in TS).
- Applying software best practices (Outside-In TDD, Clean Code).
- Responsible for all frontend framework integrations (Maplibre, Highcharts).

COFOUNDER & CTO

JOBNINJA GMBH | MAY 2015 - JULY 2021 | MUNICH

- Founded the company, built the whole software, convinced 2 investors (including HR4YOU AG), scaled it to 7 digits revenue.
- Managed a team of 4 Software Developers.
- Active since July 2021 as a technical advisor; I help the team to continue innovate and stay at the edge of the recruiting market.
